

Quantitative Techniques in Management

6th Edition

This book provides an in-depth understanding of basic quantitative tools and techniques required in analytical evaluations and managerial decision-making. With the updated content, it continues to provide rich pedagogical support including relatively large-sized practical problems to aid decision-making process of managers. The new edition will be useful for students pursuing post graduate courses in management and commerce besides professional courses like those offered by ICAI and ICWAI.

Highlights

- New Case Study after every chapter
- Solution of a game using Gambit — Software tool for game theory
- Solution of a queuing model using Jensen add-ins
- MS Excel integration across the chapters to solve problems
- Supplementary resources include Mathematics and Statistics Refresher

Contents

Preface to the Sixth Edition
Preface to the First Edition

vii
ix

| | |
|--|-----------|
| 1. Decision-Making and Quantitative Techniques | 1 |
| 1.1 Introduction | 2 |
| 1.2 Quantitative Approach to Decision-Making: OR/MS | 2 |
| 1.3 Break-Even Analysis | 12 |
| 1.4 Quantitative Analysis and Computer-based Information Systems | 18 |
| 1.5 Plan of the Book | 19 |
| <i>Exercises</i> | 20 |
| 2. Linear Programming (I): Formulation and Graphic Solution | 22 |
| 2.1 Introduction | 23 |
| 2.2 Formulation of Linear Programming Problems | 24 |
| 2.3 Generalised Linear Programming Problems | 26 |
| 2.4 Assumptions Underlying Linear Programming | 27 |
| 2.5 Advantages of Linear Programming | 28 |
| 2.6 Applications of Linear Programming | 29 |
| 2.7 Solution to Linear Programming Problems—Graphic Method | 29 |
| <i>Exercises</i> | 52 |
| <i>Practical Problems</i> | 53 |
| <i>Case Study</i> | 63 |
| 3. Linear Programming II: Simplex Method | 65 |
| 3.1 Introduction | 66 |
| 3.2 Simplex Method | 66 |
| 3.3 Solution to Maximisation Problems | 68 |
| 3.4 Solution to Minimisation Problems | 81 |
| 3.5 Big-M Method | 82 |
| 3.6 Some Special Topics | 87 |
| <i>Exercises</i> | 127 |
| <i>Practical Problems</i> | 128 |
| <i>Case Studies</i> | 138 |

| | |
|---|------------|
| 4. Linear Programming III: Duality and Sensitivity Analysis | 141 |
| 4.1 Introduction | 142 |
| 4.2 Duality in Linear Programming | 142 |
| 4.3 Economic Interpretation of Dual | 153 |
| 4.4 Sensitivity Analysis | 159 |
| Exercises | 186 |
| Practical Problems | 187 |
| Case Studies | 197 |
| 5. Specially Structured Linear Programmes I: Transportation and Transshipment Problems | 200 |
| 5.1 Introduction | 201 |
| 5.2 Transportation Problem | 202 |
| 5.3 Transportation Problem as a Special Case of LPP | 204 |
| 5.4 Some Special Topics | 221 |
| 5.5 Dual of the Transportation Model | 232 |
| 5.6 The Solver and Transportation Problem | 234 |
| 5.7 Transshipment Problem | 240 |
| Exercises | 260 |
| Practical Problems | 261 |
| Case Study | 275 |
| 6. Specially Structured Linear Programmes II: Assignment Problem | 277 |
| 6.1 Introduction | 278 |
| 6.2 Some Special Cases | 289 |
| 6.3 Dual of the Assignment Problem | 295 |
| 6.4 Travelling Salesman Problem | 297 |
| 6.5 The Solver and Assignment Problem | 299 |
| Exercises | 321 |
| Practical Problems | 321 |
| Case Studies | 331 |
| 7. Integer Programming | 334 |
| 7.1 Introduction | 335 |
| 7.2 Integer Programming | 335 |
| 7.3 Solution to IPPs | 342 |
| Exercises | 365 |
| Practical Problems | 366 |
| Case Studies | 370 |

| | |
|---|------------|
| 8. Goal Programming | 372 |
| 8.1 Introduction | 373 |
| 8.2 Goal Programming with a Single Goal | 373 |
| 8.3 Modified Simplex Method for Goal Programming | 385 |
| <i>Exercises</i> | 394 |
| <i>Practical Problems</i> | 394 |
| <i>Case Studies</i> | 398 |
| | |
| 9. Theory of Games | 399 |
| 9.1 Introduction | 400 |
| 9.2 Game Models | 401 |
| 9.3 Two-Person Zero-Sum Games and their Solution | 401 |
| 9.4 Solution of $2 \times n$ and $m \times 2$ Games | 411 |
| 9.5 Solution of $m \times n$ Games—Formulation and Solution as an LPP | 414 |
| 9.6 Limitations of the Game Theory | 420 |
| 9.7 The Solver and Game Solution | 420 |
| <i>Exercises</i> | 436 |
| <i>Practical Problems</i> | 436 |
| <i>Case Studies</i> | 445 |
| | |
| 10. Sequencing | 446 |
| 10.1 Introduction | 447 |
| 10.2 The Sequencing Problem | 447 |
| 10.3 Solution to Sequencing Problems | 449 |
| 10.4 Maintenance Crew Scheduling—An Application | 462 |
| <i>Exercises</i> | 468 |
| <i>Practical Problems</i> | 468 |
| <i>Case Studies</i> | 473 |
| | |
| 11. Inventory Management | 474 |
| 11.1 Introduction | 475 |
| 11.2 Types of Inventory | 475 |
| 11.3 Inventory Management Systems | 478 |
| 11.4 Fixed-Order Quantity System | 479 |
| 11.5 The Question of Safety Stock | 495 |
| 11.6 Periodic Review System | 506 |
| 11.7 Ss System | 508 |
| 11.8 One-Period Model of Inventory Management | 509 |
| 11.9 Selective Approaches to Inventory Control | 510 |
| <i>Exercises</i> | 530 |
| <i>Practical Problems</i> | 532 |
| <i>Case Studies</i> | 543 |

| | |
|---|------------|
| 12. Queuing Theory | 545 |
| 12.1 Introduction | 546 |
| 12.2 General Structure of Queuing System | 547 |
| 12.3 Operating Characteristics of Queuing System | 551 |
| 12.4 Queuing Models | 551 |
| <i>Exercises</i> | 590 |
| <i>Practical Problems</i> | 591 |
| <i>Case Studies</i> | 599 |
| | |
| 13. PERT and CPM | 601 |
| 13.1 Introduction | 602 |
| 13.2 Project Network | 604 |
| 13.3 Network Analysis | 611 |
| 13.4 Resource Analysis and Allocation | 619 |
| 13.5 Programme Evaluation and Review Technique (PERT) | 633 |
| 13.6 Difference Between PERT and CPM | 642 |
| <i>Exercises</i> | 662 |
| <i>Practical Problems</i> | 663 |
| <i>Case Studies</i> | 682 |
| | |
| 14. Simulation | 685 |
| 14.1 Introduction | 686 |
| 14.2 Process of Simulation | 687 |
| 14.3 Monte Carlo Simulation | 688 |
| 14.4 Simulation of an Inventory System | 690 |
| 14.5 Simulation of Queuing System | 694 |
| 14.6 Advantages and Disadvantages of Simulation | 697 |
| 14.7 Applications of Simulation | 698 |
| <i>Exercises</i> | 718 |
| <i>Practical Problems</i> | 718 |
| | |
| 15. Decision Theory | 728 |
| 15.1 Introduction | 729 |
| 15.2 Single-Stage Decision-Making Problems | 730 |
| 15.3 Multi-stage Decision-Making Problems: Decision Tree | 747 |
| 15.4 Utility Theory: Utility as Basis for Decision-Making | 751 |
| <i>Exercises</i> | 776 |
| <i>Practical Problems</i> | 776 |
| <i>Case Studies</i> | 792 |
| | |
| Appendix A: Statistical and Other Tables | 795 |
| Appendix B: Answers to Practical Problems | 809 |

| | |
|---|------------|
| Bibliography | 827 |
| Index | 829 |
| Web Chapters* | |
| A. Dynamic Programming | |
| B. Replacement Theory | |
| C. Markov Chains | |
| D. Investment Analysis and Break-Even Analysis | |
| E. Forecasting | |

* Available as online resources. Please see the back cover of the book for details.
