Abstract

The article looks at the various facets of development in China and how it reflects on everyday life of its citizens. It peeps into its road infrastructure and traffic culture, the youth aspirations, food and language syndrome, their historical links with and current view on India. It pints out how conservative approach of nation building during Mao Tze Dong's era is giving way to affluent modern life of luxury and pleasure. Yet it justifies to conclude the net gain of the society that makes it an envy to the rest of the world.

Key Words: Dragon Country, Socio-Economic Environmental Landscape of China, Brain-Drain from China, Power Distance & Hierarchy in Chinese Society
